

NITIN KUMAR

9911660055 | nitinkwork18@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFILE

Full-Stack + Cloud Engineer with hands-on experience in **building scalable web applications** and deploying them on **cloud infrastructure**, I am **fervent** about creating modern web applications. Skilled in **automating deployments**, managing cloud resources, and delivering **end-to-end** applications with high availability and reliability. I am **excited to collaborate** with cross-functional teams to enhance **user experiences** and achieve project goals.

EDUCATION

SPRING MEADOWS PUBLIC SCHOOL

10th | 7.8 CGPA

12th | 8 CGPA

DELHI, India

August 2014 – June 2016

August 2017 – June 2018

GALGOTIAS UNIVERSITY (Greater Noida)

Bachelor of Technology in Computer Science and Engineering | 8 CGPA

Uttar Pradesh, India

August 2021 – June 2025

WORK EXPERIENCE

MERN DEVELOPER (Intern) at [DECENT GLOBAL OUTSOURCING](#)

August 2024 – October 2024

- Partnered with diverse teams to outline, design, and deliver innovative features in web applications, resulting in a 15% improvement in user engagement.
- Integrated external APIs and data sources, expanding application proficiencies, and achieving a 25% increase in operational efficiency.
- Accredited and resolute over 100+ critical bugs, enlightening application solidity and reducing downtime by 30%.

Software Intern (Intern) at [INFOFIT SOFTWARE](#)

September 2025 – Present

Hope Physician (Healthcare Platform) | [Link](#)

- Worked on Hope Physician, a multi-specialty healthcare web platform delivering personalized medical services to 1,000+ users.
- Developed and enhanced frontend and backend modules using React, Node.js, and REST APIs, contributing to a 20% improvement in application performance.
- Implemented secure data handling and role-based access control, improving data reliability and supporting end-to-end patient and healthcare operations.
- Optimized application workflows, reducing manual processing time by 25% and improving overall system efficiency.
- Assisted in deploying and maintaining application features in a live production environment, achieving 99.9% application uptime
- Collaborated with senior developers to refactor code and improve system usability and maintainability, reducing bug recurrence by 30%.

Rural Samridhi Logistics Platform (Delivery Manager & Full-Stack Developer) | [Link \(App\)](#) | [Link \(EMS\)](#)

- Led the design and development of a web-based Management System and EMS (Employee Management System) for an integrated transportation and supply chain organization.
- Designed and implemented role-based access dashboards for Admin, HR, Manager, and Employee, enabling secure management of deliveries, inventory, employee records, and operational workflows.
- Developed scalable applications using the MERN stack, ensuring secure data flow and high system performance.
- Coordinated with stakeholders to translate business requirements into technical solutions, improving transparency and operational reliability.
- Streamlined workflows and enabled real-time data visibility, significantly improving overall operational efficiency.
- Designed a camera-based, location-aware attendance system with automated date and time logging, reducing proxy attendance and improving record accuracy.

PROJECTS

E-COMMERCE | [Link](#) | React, Redux, Node, Express, MongoDB/Mongoose, Stripe

- Designed and developed a responsive frontend using React.js and Redux, providing an intuitive user interface and efficient state management leading to 30% increase in customer satisfaction scores.
- Utilized Node.js and Express.js on the backend to deliver high-performance applications capable of real-time processing leading to a 50% decrease in average response time.
- Implemented Stripe for reliable and secure payment transactions.

NATOURS | [Link](#) | HTML(PUG-Template), MongoDB/Mongoose, MVC, Node, Stripe

- Engineered scalable Node.js applications by mastering core concepts such as the event loop, streams, and modules, directly contributed to a reduction of server response times by 50 milliseconds per request.
- Designed a RESTful API with advanced features (filtering, sorting, aliasing, pagination), improving data retrieval efficiency by 40%.
- Optimized performance with Mongoose and deployed MongoDB on local and cloud platforms (Atlas).
- Implemented the MVC architecture for clean code organization and integrated email functionalities using tools like Mail-trap and SendGrid to enhance user communication.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python, Bash
- **Frontend:** HTML/CSS, React.js, Redux, Next.js 13, Tailwind CSS, Bootstrap
- **Backend:** Node.js, Express.js, REST APIs
- **Databases:** MySQL, PostgreSQL, MongoDB (Mongoose)
- **Cloud Platforms:** AWS (EC2, IAM, VPC, EKS, ECR)
- **Containers & Orchestration:** Docker, Docker Compose, Kubernetes, Helm
- **CI/CD & Automation:** Jenkins, GitHub Actions, CI/CD Pipelines
- **Infrastructure as Code:** Terraform, Ansible
- **Monitoring & Observability:** Prometheus, Grafana
- **Developer & Cloud Tools:** Git, GitHub, VS Code, Postman, Nexus Repository Manager

CERTIFICATIONS

- **Coincent | [Link](#) |:** Web Development: Built full-stack web apps integrating frontend and backend technologies.
- **HTML & CSS | [Link](#) |:** Frontend Fundamentals: Created responsive, accessible layouts using Flexbox and Grid.
- **JavaScript | [Link](#) |:** Programming: Learned ES6+, DOM manipulation, and asynchronous programming.
- **React | [Link](#) |:** Frontend Framework: Built dynamic SPAs using components, hooks, and state management.
- **Node.js | [Link](#) |:** Backend Development: Developed REST APIs and server-side apps with Express.
- **AWS | [Link](#) |:** Cloud Computing: Worked with EC2, S3, Lambda, and IAM for cloud deployment.
- **Java | [Link](#) |:** Programming: Strengthened OOP concepts, data structures, and core Java APIs.
- **System Architecture | [Link](#) |:** Software Design: Learned design patterns and modular system structuring.
- **System Architecture for Large-Scale Systems| [Link](#) |:** Explored scalability, load balancing, and distributed design.
- **UI/UX Product Design Bootcamp| [Link](#) |:** Practiced wireframing, prototyping, and design thinking in Figma.
